XpressDox™ Product Range

XD: Desktop for Word

XD:Developer is used to create templates for all XD products. Over 330 commands in the developer library. Extensive help available for template developers. Ideal for small to mid-sized firms with a limited budget.

XD: Server/WinAuth for Web

XD:Server/WinAuth templates are run-only. The same template runs in all Desktop and Server versions. Ideal for enterprise-wide large firm implementations. Own-hosted only.

XD: Server/Integration for Web

XD:Server/Integration templates are run-only. Ideal for firms of all sizes who wish to simplify deployment or integrate with 3rd party applications or websites. Own-hosted or XD:Cloud.

XD: API

XD:API is included free with XD:Server/Integration version plans> 50 users.

Allows developers to integrate with 3rd party applications and websites. Own-hosted or XD:Cloud.

XD: Publisher

XD:Publisher runs on the proven XD:Server engine. Includes User, Subscriber and Subscription management. Themed to match your website. Ideal for State Bars and other content publishers.

XD: Document Services

XD:DS is provided free with all of the XD:Server versions. Includes message management, optional password protection and settings for time-out. Ideal for new client onboarding or new matter take-on.

XD:SERVER
WinAuth Version

XD:Server/WinAuth version is web-based and provides secure enterprise document automation. Uses Windows Active Directory for complete control over user, folder and file access permissions.

XD: DESKTOP

XD:Desktop is a feature–rich document automation add in for Microsoft® Word. Author (Developer), Runner and Supervisor versions available.

XD:SERVER
Integration Version

XD:Server/Integration is web-based and includes the XD user-interface. Authentication is via login and password. API is included with plans >50 users.

XD:API

XD:API delivers document automation in your own systems.

Provides server-to-server document automation endpoints for your business applications.

XD:PUBLISHER

XD:Publisher is a publishing framework which will allow you to make templates available to external users in a stable, fast and easy-to-use, environment.

XD:DS
Document Services

XD:Document Services allows XD:Server clients to send links to interviews to external clients via email. Answers are saved to the Cloud database.
